Gerard Collins, Esq.,
Bishop's House,
Northampton.

Dear Mr. Collins,

Further to your letter of the 26th November,
we append below details of prices from various firms for the
prefabricated concrete units to form the church building shown
on the drawing you sent us and which we return herewith.

We would mention that despite our clear
instructions two of these firms have complicated their quotations
by including work for which we did not ask, however, we hope the
following information will be of some assistance:-

	£.	s.	d.
Messrs. Tidnams, Ltd.,	170.	0.	0.
Messrs. Girling Ferro-Concrete Co., Ltd.,	151.	7.	0.

The above firms include for the supply only of the
necessary prefabricated units for a building 60'0" x 24'0" x 10'0"
high to eaves.

All site work such as foundations, floors, roof
sheeting, and walls is excluded.

Messrs. John Ellis & Sons, Ltd.,	£ 590.	0.	0.
----------------------------------	--------	----	----

This firm quotes for supply and erection of a
similarly sized building and includes walling, one single door, one
double door, fifteen unglazed windows, but does not apparently
include the roof sheeting, foundations and floors.

Messrs. Beecham Buildings, Ltd.,	£ 690.	15.	0.
----------------------------------	--------	-----	----

This firm includes in the above price the supply
and erection of a building 60'0" x 28'0" x 10'0" high to eaves.

A similar building supplied and erected £890. 0. 0.
complete with walling and roofing.

/ Both

FR/MH.

11th December 1952.

Both the above are exclusive of site work such as foundations and floor.

We would mention that all the above prices are exclusive of transport charges which for a guide would be somewhere in the region of £10. 0. 0.

Should you require any more detailed information or a further clarification of the estimates do not hesitate to let us know.

Yours faithfully,

Peters & Rimaraw

Enclosure.
